Description

Rotating work tray for Bonsai that you can fix to a table thanks to its robust vice wrench.

It enables to rotate very easily the bonsai on it in all directions (very pleasant, especially for the work).

A diameter of 215 mm (covered by a skid-proof structure) on which, thanks to strong and soft rollers, the rotation is very easy.

This tray (that can be divided) is fixed to the vice wrench by a very robust ball point.

The whole of it is made with injected cast aluminium painted in the oven.

Sold without rubber tensioners and without the bonsai.
