### Description

**Large grain bonsai soil used for making drainage beds. Used by all bonsaists in the world.**

Weight +- 1.5 kilo bag. Grain size 5/8 mm.

SUPERIOR QUALITY, DRIED FOR MORE THAN 2 YEARS. Weight according to the rate of moisture of 8.15 kilograms.

**Origin:** natural volcanic earth from the mountainous regions of Japan.

**Benefits:** soil drainage and root ventilation for the healthy growth of your bonsai.

**How to use:** use alone or add gravel and large-grained sand but not compost. This earth is not very nourishing and a [Biogold](#) fertiliser should be used regularly. You'll need to water this large-grained soil more in summer.

**Species:** for cultivating all coniferous and deciduous species (except rhododendrons and azaleas, for which you'll need [Kanuma](#) soil).
